

Safe Walking and Biking

- Walk (do not run) on the School footpaths and always treat the driveway as if it is a road i.e. use the crossings.
- If a problem arises after school and you need help, return to the office, tell one of the school parents who may also be walking, or tell another child from our school.
- Be aware of the potential danger of driveways, look and listen for backing cars.
- Always use the pedestrian crossing outside our school to cross Sunnybrae Road. Look both ways and check that cars have stopped, even if the buzzer is sounding!
- All children should leave the grounds at 3pm or wait with the Principal at the gate if their parent/caregiver is late. Children should only play in the playgrounds after school if they are with their parent or caregiver.
- Walk your bike or scooter in and out of the school grounds, remember that pedestrians have the right of way on footpaths - be considerate of them.
- Park your bike or scooter in the scooter rack or bike stand.
- Cyclists must wear fitted helmets and it is a good idea for children on scooters to do this too. All cyclists must apply for a bike licence that will be issued by the Principal.

In accordance with police advice, it is our recommendation that children should not ride a bike to school until 10 years old, unless accompanied by an adult. Application forms are available from the office. Children need to apply for a new licence each year.

Scooter training is provided by our Police Education Office each year and students are provided with high viz vests to wear if they are planning to regularly ride their scooters to school.
